

A new shape for success
New RTS Collection

New functions for new levels of comfort

In addition to standard comfort controls, the new RTS collection provides new functions that are more closely adapted to current life styles.
Radio Technology Somfy® is very easy to install and personalize for individual preferences.

NEW: Create scenarios, play them whenever needed or program them with a timer

Impresario Chronis RTS

There is no better remote control unit available to centralize and control the movements of openings (windows, gates, doors, etc.) from anywhere in the home.

- Each motorised fitting can be lowered, raised or set to a favorite position independently from all the others.
- The system can also be programmed to open and close shutters, etc. at pre-set times.
- The Automatic / Manual function enables users to over-ride pre-settings instantaneously.

NEW: To control the house zone by zone

Telis Composio RTS

The one and only home zone control. Separate control of, for example, the ground floor, upper stories, façades exposed to wind or sun etc.) and access (street gates, garage doors, etc.).

- All the products in the same group are raised, lowered or set to a favorite position simultaneously.
- Each group is identified on the screen thanks to its name and can be founded at a glance.

NEW AND EXCLUSIVE FOR VENETIAN BLINDS: To easily control natural light.

Telis Modulis 4 RTS - Telis Modulis Soliris RTS

Individual or general remote control units enable very precise adjustment of Venetian blind slat angles with the central wheel.

- Two versions:
- 4 + 1 channel remote controls
 - Soliris: combined with a wind/sun sensor to automatically tilt the Venetian blind slats according to the sunlight. Natural light now has a "dimmer".

A new design to attract new consumers

Radio Technology Somfy® : the trade benchmark for residential wireless control systems

The new RTS collection positions Radio Technology Somfy® as the benchmark for home comfort control. With over 3 million installations worldwide since 1998, Somfy's secure radio technology has become a "must" for reliable, flexible and simple-to-install control of automated openings in the home.

The new design of Somfy remote controls emphasize perceived quality and simplify the use of the new functions.

Easy to use every day:

- 1 - Clear, sleek and functional designs
- 2 - "Active function" feedback light.
- 3 - The smooth rounded shapes of these remote control units make them easy to hold.

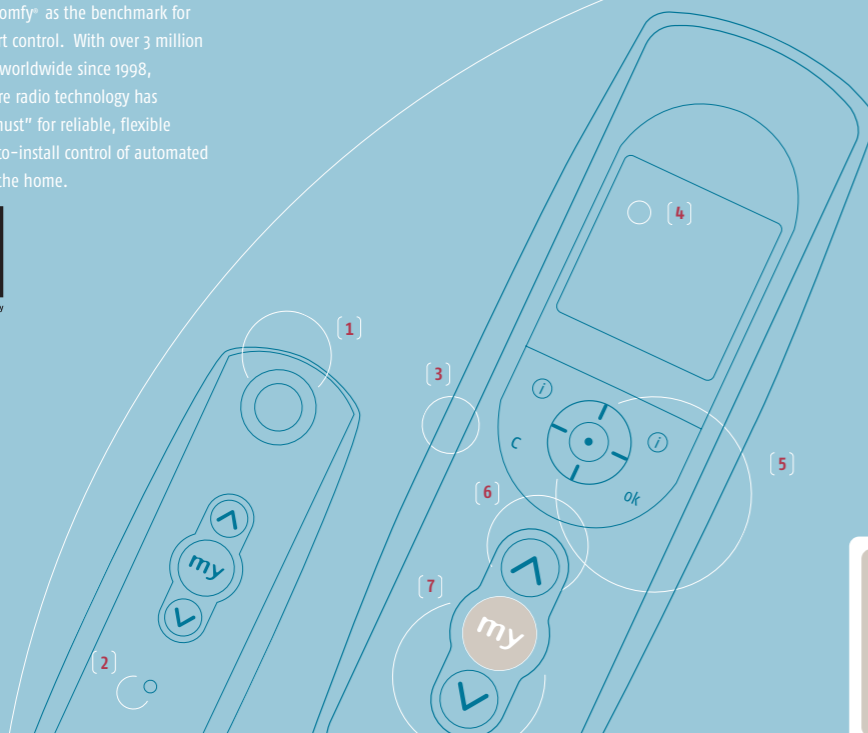

Enhanced strength:

- 3 - Rubber contours make the remote control units shock-resistant.
- 4 - Patio version is water-resistant.

User-friendly ergonomics:

- 4 - Remote controls with wide digital screens.
- 5 - Ergonomic directional control pad.
- 6 - Raise, lower and "my" favorite position keys.

- 7 The "my" button personalizes each users "favorite" position
 - Easy to program
 - Easy to use
