SOLUTIONS FOR BUILDING CONTROL

Ref. 1822064

Building controller for solar shading and window automation to control up to eight individual façades/zone orientations.

Each zone can connect up to 100 animeo IB+ motor controllers to control any solar shading application.

A system with one Building Controller can control up to eight zones (façade orientation) and a system with two Building Controllers to control up to 16 zones. One system can control 6.400 motors.

Compatible with all IB+ Motor Controllers, incl. Smoove UNO IB+.

Installation advantages

- > Spring tension terminals and double terminals for safer and quicker installation.
- > Direct inputs to connect to 3rd party cooling and heating systems.
- > Status feedback through LEDs.
- > Designed for DIN rail installation in the electrical cabinet.

Functional advantages

- > Takes weather conditions and building occupancy into account to optimize management of solar shadings for comfort and energy saving.
- > Simple and intuitive configuration, monitoring and maintenance through animeo IB+ system and operating software.
- > Offers a range of functions and parameters designed for different types of application (Venetian blinds, screens, roller shutters, windows) building types and user needs.
- > Sun tracking: instead of one fixed position, up to three different positions can be actuated per day for each zone. These three positions can be set by the software and can differ automatically for each month.
